

## **Supplementary Regulation For Parade 2017 Autocross**

The G-3.3 Supplementary Regulations of the 2017 PCRs states:

Entrants must also comply with the supplementary regulations published by the Parade Committee. Supplementary regulations, posted on the PCA website for the Parade, will also be contained in registration packet. Supplementary regulations will be in addition and not in conflict with the PCRs unless approved by the PCR Committee.

Under G-3.3 of the 2017 PCRs, the PCR Committee adds a supplementary regulation to the Parade 2017 PCR Autocross Rules which states the following:

The penalty for missing a gate will be ten (10) seconds and not a DNF. However, Three (3) or more missed gates **does** result in a DNF.

Note:

The change is made in an effort to make it harder for a driver to get a DNF on all runs. Committee feels this will encourage first time drivers to enter the autocross at the next Parade Autocross that they attend, instead of giving up.

Presented by Danny Saxton PCR Committee Chair.
